

Class Archive App - Product Requirements Document (PRD)

1. Overview

The Class Archive App is a mobile application (Android, optional iOS) designed for an Electrical Engineering modular course. It serves as a structured academic archive and class management tool including lesson storage, timetable automation, discussion forum, and push notifications.

2. User Roles & Permissions

Role	Permissions
Admin	Full access: manage lessons, timetable, notifications, users, moderation
Teacher	Upload/edit own lessons, post announcements
Moderator	Monitor and manage forum content
Student	View lessons, participate in forum, receive notifications

3. Explore Page (Lesson Archive)

- 1 Lessons displayed in reverse chronological order.
- 2 Each post contains Topic, Subtopic, Teacher, and Image preview.
- 3 Detailed view includes: Full lesson copy (PDF/DOC), Summary, Practical images, Reports, Extra notes columns.
- 4 Search and filter by topic, teacher, module, and date.
- 5 Optional YouTube link section (no in-app video hosting).

4. Timetable Page

- 1 Daily/Weekly schedule view with subject color coding.
- 2 Real-time progress bar showing current lesson progress.
- 3 Push notifications: before lesson, at start, and at end.
- 4 Admin-managed schedule with optional Excel/Calendar import.
- 5 Conflict detection and automatic silent mode during lessons (optional).

5. Forum Section

- 1 Text and image-based chat system.
- 2 Message length limits to prevent spam.
- 3 AI moderation engine to block inappropriate or irrelevant content.
- 4 Report system for users to flag messages.
- 5 Search within chat and topic-based discussion threads.

6. Notification Center

- 1 Centralized notification inbox.
- 2 Categories: Urgent, Reminder, Event, General.
- 3 Push notification support (Android & iOS).
- 4 Read/Unread tracking and filtering.

7. Registration & Authentication

- 1 Registration fields: Registration number, profile picture, phone, email, password, hostel status.
- 2 Default role: Student.
- 3 Login via email, phone, username, or Google sign-in.
- 4 Secure authentication and password recovery support.
